

Table Tennis Queensland Computer Ratings 10 March 2002 following Far North Coast Open

Key points on how the ratings work

- Includes all results from singles events at Open Championships, State Championships, and inter-club team matches such as the SEQ Pennant.
- Your rating improves when you win a match and the amount depends on the difference between your rating and the loser's rating. The loser's rating will be reduced by a similar amount.
- The status of the event and the stage of the event are not considered.
- No incentives or weightings are given for playing more often as this reduces the accuracy of the list.
- Players are not included on the ordered list, if their uncertainty is greater than 98.
- Uncertainty is based on the time since last played, the number of matches and the uncertainty of opponents.
- Uncertainty is technically the standard deviation of the estimate of the player's rating.
- This can be explained in simple terms by saying that the actual playing strength of a player with rating 1500 and uncertainty of 50 is likely to be between 1450 and 1550.

Purpose of Ratings

- The ratings, rather than the order, are a guide to a player's current standard. For example, a player on 1684 may strive to reach the 1700s.
- Tournament organisers may wish to consider the ratings when seeding draws. However it is recommended that other issues are considered particularly for players not on the list.
- Officials grading players for tournaments and inter-club matches can compare standards. The following is a guide to grades that a player would normally be eligible for. These cutoffs are only suggestions and are not TTQ policy.

Rating	Range	Grade
< 2530	450	Open
< 2080	310	Special
< 1770	190	Reserve
< 1580	210	B
< 1370	444	C

Avoidance of Errors

In order to minimise the risk of error, it is important that Associations running tournaments ensure the following.

- Include players first names in full at least once on the results sheets. There are many pairs of players with the same initial and surname. Mix-ups have occurred in the past
- Ensure that, if a match was not played, the score is indicated as a walkover (w/o). These will not be included in the calculations.
- If a player forfeits during a match, the score is indicated. For example if a player withdraws when the score is 5-5 in the first game, the score is indicated as 21-5, 21-0. These will be included in the calculations.

Note: New players start with a rating of 1455 and an uncertainty of 260. They are not placed on the order list until they have played enough matches to get their uncertainty down to 98.

News

Note that in the previous list, a match between Timothy Young and Brendan Cahill had been entered incorrectly. This also affected many other players and these have been corrected.
